University Physics Experiment (4) [Paperback]

By BEN SHE.YI MING

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 139 Language: Simplified Chinese Publisher: Science Press; 1st edition (July 1. 2011). University physics experiments (4) is the general higher education Eleventh Five-Year National planning materials. The book is Chapter 6. Chapter 1 is the spectra and energy levels of the three experiments: atomic emission spectrometry. atomic absorption spectroscopy. Raman spectroscopy; Chapter 2 of the three experiments on the effect of the light field: the magnetic rotation effect. the Zeeman effect. sound optical effects; Chapter 3 of the three experiments on magnetic resonance: NMR. electron spin resonance. optical pumping magnetic resonance; Chapter 4 is on the microwave characteristics of three experiments: space microwave optical properties. microwave Michelson interference and Bragg diffraction. waveguide microwave parameter testing; Chapter 5 nuclear decay and radioactivity of the three experiments: y-ray spectrum measurement. the statistical laws of the nuclear decay 7-ray absorption; Chapter 6 is about solid structures observed experiment: the solid structure of the X-ray diffraction analysis. microscopic observation of the solid morphology. microscopic observation of the solid melting process. College Physics (4) can be used as the textbook of...

Reviews

This book is amazing. it was writtern very completely and helpful. Your way of life period is going to be enhance as soon as you full reading this pdf.

-- **Antonia Lindgren II**

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Dylan Schaden**
