Book Condition: New. Publisher/Verlag: Springer Netherlands | The first edition of this book appeared in 1984 and covered the literature until the end of 1982 (one chapter dealt with much of 1983). The present volume is based on the literature published since then until approximately mid-1992. As before, it attempts to highlight the most important advances in all the main areas of natural products research, focusing on structure, chemistry, synthesis, and this time, where appropriate, biosynthesis. Each chapter is necessarily selective but the scope is extended by frequent citation of recent reviews. R. H. T. Contributors Dr C.
