Not illustrated. 1917 Excerpt: .may be contracted extra-genitally and that the innocent is as exposed to the contraction of the disease as the incontinent--at this junction--society at large began to loosen up its persecution of the unfortunate syphilitic. Syphilis, as a disease, began to be considered by the medical profession in the same light as measles, tuberculosis, etc., especially since the advance of social and personal hygiene. In the dentist, the physician ought to find the most sympathetic and solid support in combatting syphilis. The support ought to be given to the medical men not only as a mere benevolence or for mere humanitarian views, but for self defence. The mucous membrane, especially near the angles of the mouth is a favorite place where the mucous patch or condyloma latum so frequently forms a luring bait for the chapped fingers of our average dentist. Now then, is the average dentist...
